Adaptations

Let's identify the adaptations the Bald Eagle and the Sanderlings have and figure out how they are useful for hunting and survival. Then let's compare how these adaptations detail where these birds live, and what they eat!

Describe the differences between the adaptations each bird has and try to figure out how they help the bird hunt, move around, and or survive.

Bald Eagle

Feet:

The Bald Eagle has long sharp talons on his feet that are good for...

Legs:

Beak:

Sanderlings

Feet:

Legs:

The Sanderling have long legs that are good for...

Beak:
